

Says

What have we heard them say?
What can we imagine them saying?

Thinks

What are their wants, needs, hopes, and dreams?
What other thoughts might influence their behavior?

Voyage vista:
Illuminating
insights from uber
expeditionary
analysis

Uber provides a convenient way for individuals to request rides from drivers who use their own personal vehicles.

It was founded in 2009 by Garrett Camp and Travis Kalanick and is based in San Francisco, California.

Uber is a multinational transportation network company that operates a ride-hailing platform.

Uber Driver Analysis refers to the Analyzing the number of trips taken by Uber drivers can provide insights into their overall activity and the demand for rides in specific areas.

Trips can be analyzed based on geographic regions or specific cities to identify areas with higher demand.

This analysis can help Uber drivers decide where to focus their driving efforts for maximum efficiency and profitability.

The Major of our project is to use data Analyzing techniques to find unknown patterns in the Uber Drives dataset.

The research is carried out on Uber drives data collected from the year 2016.

Having travelled about three miles , we came to a long kind of building, made of timber stuck in the ground, and wattled accross.

Daily, Weekly, or Monthly Analysis: Uber's data can be analyzed on a daily, weekly, monthly basis to understand the trends and patterns of trip volumes.

This analysis can help identify peak hours or days of high demand and optimize driver availability during those times.

taking problems like poor transportation infrastructure in some cities, unsatisfactory customer experience, late cars, poor fulfillment, drivers denying to accept credit cards.

Does

What behavior have we observed?
What can we imagine them doing?

Feels

What are their fears, frustrations, and anxieties?
What other feelings might influence their behavior?
